

MCN Healthcare Announces Expansion

Healthcare organizations' need for streamlined regulatory compliance solutions underscores MCN Healthcare's business growth

MCN Healthcare, a leading healthcare policy management and learning management software company, announced today that they have expanded their Denver offices at 1777 South Harrison Street, Suite 405, Denver, CO 80210 to accommodate its expanding staff.

As healthcare organizations continue to create, revise and manage policies in accordance with numerous regulations and standards - as well as best practices - they are increasingly relying on MCN's Healthcare's established policy and procedure expertise, coupled with technological know-how to manage this otherwise cumbersome task. Ultimately, the goal is to provide better healthcare and avoid the consequences of non-compliance.

The expansion coincides with the company's 29th anniversary serving the healthcare industry. According to Amanda Valeur, President and Founder of MCN Healthcare and MCN Learning, "We are expanding our IT Development, Customer Experience, Content and Sales teams to ensure continued success of our existing products and services, as well as the development of new products. What ties it all together, is our emphasis on providing the best customer experience in the market."

ABOUT MCN HEALTHCARE
