

**EBSCO Information Services and MCN Healthcare
Partner to Offer Healthcare Policy Expertise**
*~ Seamless Integration into Dynamic Health™ Combines
Policies and Procedures for Healthcare Professionals ~*

IPSWICH, Mass. — October 8, 2019 — EBSCO Information Services ([EBSCO](#)) has partnered with [MCN Healthcare](#) to seamlessly integrate skills and procedures content from [Dynamic Health™](#) into the MCN platform. *Dynamic Health* is EBSCO's evidence-based resource designed to help nurses and allied health professionals master critical skills. MCN provides custom policy content, document management software and compliance expertise to healthcare organizations.

MCN is unique in that it is the only solution provider offering both a policy management system and policy content. With the integration of *Dynamic Health* procedure content, MCN offers a complete solution to the policy and procedure processes, allowing healthcare organizations to save valuable time, money and resources on creation and upkeep of their digital policy and procedure repository.

Policy and procedure creation, upkeep and management are significant challenges faced by health systems and providers. The ability to access policies in an easy, streamlined manner is a vital step in the healthcare process. This access helps facilities meet state laws and regulations, federal healthcare requirements, Joint Commission and NIAHO standards, CMS and other accreditation requirements.

EBSCO Information Services Chief Nursing Officer Diane Hanson says this relationship reinforces EBSCO's commitment to supporting evidence-based nursing practice and reducing care variation. "The integration of skills and procedures content into a resource like MCN makes it easy for providers to meet regulatory compliance and shift their focus to providing meaningful patient care. EBSCO's evidence-based approach ensures the latest clinical information is available to healthcare professionals, offering consistency of care across the continuum of care."

MCN Healthcare's Executive Vice President Pamela Gustafson says they understand healthcare professionals are committed to ensuring high-quality care for their patients. "Our partnership with EBSCO helps further enhance accessibility to evidence-based procedures and skills, as well as policies, ensuring healthcare organizations' ability to seamlessly implement the most current regulatory compliance and evidence-based nursing practice for optimal patient care. The integration of EBSCO's *Dynamic Health* with MCN's comprehensive Policy Manager solution closes the circle of regulatory compliance, policy process and evidence-based nursing practice."
